

AXON' offers flat cables with a fine gold coating on the stripped ends

Gold plated cables !

In addition to flat cables with bare copper and tinned copper conductors AXON' are now able to offer cables with a flash of gold on the stripped ends. These cables are compatible with gold contact FFC/FPC connectors.

Simple Construction

The construction of the cables is simple: the flat conductors are insulated with Polyester or Polyimide tape and equipped with reinforcements for use with ZIF/LIF connectors (Zero-/Low Insertion Force).

AXON' also offer special versions, for example special markings, notchings, punchings, window cuts, slittings, mounting brackets, folds and crimped contacts.

A few words about AXON'

The AXON' group is the first manufacturer of flat flexible cable in Europe. The Company specialise in designing and manufacturing high tech conductors, electronic cables and interconnect solutions for markets such as consumer electronics, telecommunications, computer, automotive, military, medical, aeronautics, space industry etc.

The headquarters of the company is situated in Montmirail in France (100 km east of Paris) and employs 1800 staff world-wide.

Its consolidated turnover amounts to 85 million Euro in 2005. 60 % of sales are achieved in export.

AXON' manufacture flat cables using state-of-the-art production equipment in the European, US and Chinese factories.
