

AXON' Micro-D connectors are QPL qualified per MIL-DTL-83513

AXON' CABLE Incorporated announces its placement on QPL-83513 and is now officially certified to produce MIL-DTL-83513 Qualified Micro-D 0.050" Pitch Connectors to the following : M83513/01, /02, /03, /04, /06, /07, /08, /09. The QPL-approval enables AXON' CABLE to widen its range of products and to do business with military companies which require this approval throughout the world.

The best choice for severe conditions

By its very design, the Micro-D connector system meets all requirements : robustness, durability, low contact resistance, high current, dielectric strength, vibration, shocks etc...Micro-D connectors which are half the size of the most used connectors (D-sub connectors) are an ideal choice for severe operating conditions such as : aerospace, military, industrial, medical or off-shore where weight saving , miniaturization or signal transmission integrity are paramount. All of these MIL qualified products use high reliability twist pin technology.

A complete solution

While competitors may have been on the QPL list before AXON', the company offers a complete solution to the customer. As a specialist in advance interconnect solutions, AXON' has for over 10 years offered a complete Micro-D range of PCB connectors and harnesses. Not only does AXON' manufacture the key component parts of the Micro-D connector (twist-pin contacts, insulators, seals, etc...), they manufacture specialized wire and cable and of course complete cable assemblies as well. This allows AXON' to offer a total solution to companies seeking to solve problems like EMI and ruggedized harnessing for severe environments. The group has such a wide variety of products and solutions that often their customers special product is one of their standards.

A few words about AXON'

Originally founded in the Champagne region of France, the AXON' CABLE group has grown to become a world-wide organization with over 1600 staff located in Sales and Manufacturing centers throughout Europe, across the Pacific Rim and North America. The ability to offer custom design solutions for high tech markets keeps AXON'CABLE at the forefront of cable technology and continues to ensure group turnover of over \$100 million.
