

Be-to-link™, change your view of videoconferencing

→ Your very first video-conference?

You have heard of videoconferencing in the media or from your colleagues, but you have never tried it. Perhaps you have never had the opportunity, perhaps you don't feel you need it, perhaps you have pre-conceptions?

NEOLINKS will accompany you in your discovery of videoconferencing with Be-to-Link™.

→ Need to update your view of videoconferencing?

You have already had a chance to try videoconferencing. At home or at work with off-the-shelf software or dedicated hardware in a special room...

NEOLINKS offers you a chance to rediscover videoconferencing with Be-to-Link™.

→ Sweep away your pre-conceptions!

- It doesn't work when you want it to.
- It puts corporate security at risk.
- Lack of reliability = lack of professionalism.
- Poor picture quality = impossible to work.

The preconceptions about videoconferencing are totally unjustified with a professional solution like Be-to-Link™.

Be-to-link™

→ The videoconferencing solution for businesses

Because the business world is never satisfied with approximation, Be-to-Link™ is designed to solve all the problems relating

to videoconferencing. Simplicity, security, reliability, user-friendliness and finally, competitiveness.

→ SIMPLICITY

«To start your videoconference, simply call your contact».

NEOLINKS provides you with support in setting up Be-to-Link™ and in your use of it. You can also download the software yourself from the NEOLINKS website and create accounts for your «contacts».

→ RELIABILITY

«Whenever you want, for as long as you want, with the quality you need».

With Be-to-Link™, you connect whenever you want (total availability, without booking or waiting). Your conversation goes through servers which guarantee high-quality, uninterrupted conversation, for as long as you like.

→ USER-FRIENDLY

Nothing can replace a «contact by Be-to-Link™».

With Be-to-Link™, you can see your contact wherever they are. You can view the same document and validate the modifications to it live: a solution that will increase the effectiveness of your meetings.

→ COMPETITIVENESS

«Cheaper than travelling to meetings, more profitable than a telephone subscription».

Calculate what you will save thanks to NEOLINKS and you will adopt it immediately. Zero investment in hardware, you can use your existing computer. Unlimited communication whenever you want. You can have as many free contact logins as you need: your contacts do not pay for the communications.

→ SECURITY

«With Be-to-Link™, all your audio, videos and data communications are encrypted».

The Be-to-Link™ software is based on WideLinks™ technology, which enables you to communicate with whoever you want without degrading your IT security policy, nor that of your correspondents.

Be-to-link™, invite, control, exchange!

→ INVITE

Download the software from our site Neolinks.com

- Updates are automatic.

Install Be-to-Link™ very simply.

- Then all you have to do is invite your correspondents from your control panel.

BE-TO-LINK™ PLUS POINTS

- Compatible with NAT and FireWall networks.
- Can be deployed on a workstation in 5 minutes.
- Unlimited multipoint communication with no advance booking.

→ CONTROL

You control your videoconference thanks to a series of simple functions.

- Presence status for your correspondents (connected, disconnected, call in progress).
- One-click call procedure - just select your correspondents, then click on «call».
- Missed call log and management of double calls.

- Full audio communication between all participants.
- Speaker indication - at a glance, you know who is speaking.
- One-click selection of the video of your choice, from among all the participants at the meeting.

→ EXCHANGE

At any time, you may switch to full screen or exchange information on shared documents.

- Full screen video mode for more natural communication or video projection in a meeting room.

- Synchronous shared workspace, structured in the form of renameable tabs shared by all the participants.
- Sharing of images, photos, diagrams and texts.
- Screen capture of any application active on your PC.
- Slide show function for your online presentations.
