SPECIAL COMBO CONNECTORS ............................... 160
Continuous miniaturisation in electronics makes it ever more challenging to route power and RF signals through very small connectors.

The ideal solution is the AXON Combo Micro-D. These special, hybrid connectors accommodate a mixture of power and coaxial cables, along with regular signal wires, all in one compact body.

They are available in 2 types and 3 different styles.

**PCB connectors**

- **BS TYPE**
  - Board Straight connector for flexible and rigid printed circuit boards,
  - Various tail lengths available.

- **CBR TYPE**
  - Condensed Board Right angle connector for flexible and rigid printed circuit boards,
  - Various tail lengths available.

**Pigtail connectors**

- With coaxial cables (different types and sizes available),
- Connectors are backpotted to protect contacts,
- A mixed arrangement with coaxial and power cables is also possible.
Contact Arrangements

Combo Micro-D connectors use two types of contacts in two sizes:
- 2.2 mm and 3 mm diameter coaxial contacts.
- 2.2 mm and 3 mm diameter power contacts.

Arrangements can vary depending on the number and the size of the coaxial, power and signal contacts. AXON’ standard combo Micro-D connectors are available with four different mating faces.

Mating Face View

Male Mating Face

Female Mating Face

C1/P1: 4 Contacts Ø3mm in a 51 Way Micro-D Shell

C3/P3: 2 Contacts Ø3mm + 21 Signals in a 51 Way Micro-D Shell

C10/P10: 4 Contacts Ø2.2mm + 20 Signals in a 51 Way Micro-D Shell

C8/P8: 4 Contacts Ø2.2mm in a 25 Way Micro-D Shell
AXON® uses micro-miniature high frequency and high power contacts to provide the optimum performance within the smallest available space. Two contacts sizes are available: 2.2 mm and 3.0 mm.

AXON® also offers coaxial contacts in 2 different impedances - 50Ω and 75Ω - and power contacts in different current ratings, from 5A to 20A.

Their characteristics are detailed below:

### COAXIAL CONTACTS

<table>
<thead>
<tr>
<th>CONTACT TYPE</th>
<th>MEDIA</th>
<th>CONTACT IMPEDANCE</th>
<th>INSULATION RESISTANCE</th>
<th>SWR (contacts only)</th>
<th>FREQUENCY (max.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ø 3.00 0.118</td>
<td>PCB</td>
<td>50 Ω AND 75 Ω</td>
<td>10Ω / 250 Vrms (*)</td>
<td>&lt; 1.05 + 0.04 F (GHz) (*)</td>
<td>3 GHz</td>
</tr>
<tr>
<td>Ø 3.00 0.118</td>
<td>Coaxial cable</td>
<td>50 Ω AND 75 Ω</td>
<td>10Ω / 250 Vrms (*)</td>
<td>&lt; 1.05 + 0.04 F (GHz) (*)</td>
<td>6 GHz (depending on cable)</td>
</tr>
<tr>
<td>Ø 2.20 0.086</td>
<td>PCB</td>
<td>50 Ω</td>
<td>10Ω / 250 Vrms (*)</td>
<td>&lt; 1.05 + 0.04 F (GHz) (*)</td>
<td>1 GHz</td>
</tr>
<tr>
<td>Ø 2.20 0.086</td>
<td>Coaxial cable</td>
<td>50 Ω</td>
<td>10Ω / 250 Vrms (*)</td>
<td>&lt; 1.05 + 0.04 F (GHz) (*)</td>
<td>3 GHz (depending on cable)</td>
</tr>
</tbody>
</table>

(*)The above values depend on the impedance of the PCB the connector is connected to.

### PCB VERSION

- with coaxial contacts:
  - 75S: Board straight connector, 0.075" pitch for signal lines.
  - CBR: Condensed board right 0.100" pitch for signal lines.
- with power contacts:
  - CBR: Condensed board right 0.100" pitch for signal lines.

### HARDWARE

B: No hardware.  
P: Jackposts.  
Px (x: 1 to 5): Panel mount jackposts.  
T: Threaded inserts installed.  
W: Jackpost and threaded inserts installed.  
Wx (x: 1 to 5): Panel mount jackposts and threaded inserts installed.  
See pages 190 to 200 for hardware description.

### CONDUCTOR TYPE (for signals)

G: Gold plated solid conductor AWG25.  
T: Tin plated solid conductor AWG24.  
Blank: For contact arrangements without signal contacts (C1/P1 or C8/P8).

### TAIL LENGTH

INTRODUCTION TO HERMETIC CONNECTORS

Hermetic connectors are used in applications where an enclosure needs to be isolated from the outside environment. Panel feed through is the main application for this type of connector.

In the vast majority of applications, the use of a hermetic encapsulant offers sufficient levels of hermeticity at a reasonable price. Only extreme environments require glass-to-metal sealing.

Furthermore, AXON® fully tests its hermetic Micro-D solutions to provide reliability and satisfaction to its customers. Helium leak rate is the most common and most reliable method to quantify a small leak.

Based on its expertise, AXON® can also design tailor-made connectors to fit your application needs.

*: Leak rates are measured by helium leak detection  
**: temperature range can be increased depending on application

By mounting the flange to the panel, all AXON® hermetic Micro-D connectors can be used to maintain low or high pressure vacuum seals.

They are fully compatible with standard Micro-D connectors. A wide range of products is already available however custom interconnect solutions can be designed for specific panel cut-outs and thicknesses. Please contact us for any specific hermetic applications.
REAR PANEL MOUNTING GUIDE

HERMETIC FEED THROUGH CONNECTORS

Micro-D hermetic feed through is only available as rear panel mount connectors. Specific jackposts are used to secure the feed through on the panel.

- Recommended Ra for panel surface: <0.8 µm
- Recommended torque (jackposts): 0.35 N.m
- Connector parts and panel must be cleaned off before mounting for better performances
- Design is made to be used without vacuum grease
HERMETIC CONNECTOR

- High performance hermetic metal connector and PTFE wire.
- Male Twist Pin or female connector.
- 9 to 100 contacts.
- According to MIL-DTL-83513.

- Non-magnetic low profile metal shell connectors ................. 173
- Non-magnetic plastic shell connectors ......................... 174

PCB CONNECTORS
- PCB connectors overview .......................................... 175
- Non-magnetic PCB connectors .................................. 176
Interest in powerful magnetic fields and accurate magnetic sensors has significantly increased in high-tech industries over the past decades. Various applications (MRI, low magnetic field detection systems, etc.) now use these complex phenomena, but accurately measuring a magnetic field is challenging. The difficulty comes mainly from interference caused by any ferromagnetic material surrounding the probes. At the same time, systems using such magnetic fields are spreading and components tend to be closer to each other, further increasing magnetic interference.

A standard Micro-D connector made to the requirements of MIL-DTL-83513 contains materials such as austenitic stainless steel, which can easily be magnetized. To avoid interference from interconnects, AXON® has developed a new product range: non-magnetic Micro-D connectors.

These connectors have limited or no influence on magnetic field lines, improving the reliability of magnetic measurements, even down to nanoTesla level, $10^{-4}$ times lower than the Earth’s magnetic field. AXON’s non-magnetic Micro-D connectors have been designed using new materials and surface treatments, avoiding ferromagnetic materials. The manufacturing process has also been developed to keep them “as clean as possible” magnetically.

**MAGNETIC TESTING**

In order to further enhance and test its non-magnetic product range, AXON® has developed its own test equipment and procedure, based on recognized standards, to characterize and quantify the magnetic influence of connectors on their environment.

The first step is to measure the initial magnetic state of the Unit Under Test (UUT) using a three-axis probe. Then a high magnetic field of 0.5T (Earth’s magnetic field is about 50µT in Europe), is applied to the UUT.

Finally, the intensity of the field is gradually decreased to nil, and the residual magnetism level of the UUT is measured with the three-axis probe. As a result of this procedure, the influence of a strong magnetic field on the UUT is known.

To minimize the possibility of magnetic interference from the surrounding area, the tests are carried out in a specially-constructed facility (see figure 1) which is made from magnetically neutral materials. Additionally a magnetic shield is used to shield the item tested from the Earth’s magnetic field (see figures 2 & 3).
For a material studied in a magnetostatic state, a link between the physical quantities of the Maxwell’s equations can be simplified to:

\[ B = \mu_0 (H + M) \]

Where \( B \) is the magnetic flux density generated by the material in Tesla (T), \( \mu_0 \) is the magnetic permeability of vacuum in Henry per meter (H/m), \( H \) is the magnetic field intensity generated by the environment in Ampere per meter (A/m), and \( M \) is the sum of the magnetic moments of the material or magnetization in Ampere per meter (A/m).

If the item is perfectly non-magnetic, \( M = 0 \). So if the magnetic field generated by the environment is also nil (\( H = 0 \)), the measured magnetic flux density \( B \) is also nil.

**Relationship between physical quantities commonly used:**

1 Oersted = \( \frac{10^3}{4\pi} \) A/m

1 T = 10^4 Gauss = 10^4 Gamma

---

CONNECTOR GENDER
P: Male (pin contacts).
S: Female (socket contacts).

TERMINATION TYPE
For colour codes F, L, W
1: E 2607, AWG 26, 7 strands, 600V.
4: E 2619, AWG 26, 19 strands, 600V.
6: E 2807, AWG 28, 7 strands, 600V.
8: E 3007, AWG 30, 7 strands, 600V.
A: E 2407, AWG 24, 7 strands, 600V.
C: E 2419, AWG 24, 19 strands, 600V.
E: M22759/33, AWG 26, 19 strands, 600V.

For colour code V only
3: M22759/11, AWG26, 19 strands, 600V.
F: E2607, AWG26, 7 strands, 600V.
S: AWG 25 silver plated.
FS: Solder cup.
See page 29 for wire types.

COLOUR CODE
F: All yellow.
L: All white.
W: 10 colour repeat.
V: MIL-STD-681 striped (only for wire types 3 and F).
See page 30 for colour code.

WIRE LENGTH (in cm)
Attention! Wire length in centimeters - (1cm = 10mm = 0.394”).
BLANK: If termination type is FS.

PCB CONNECTORS OVERVIEW

AXON® Micro-D Printed Circuit Board connectors are designed for interconnection of PCB’s inside-the-box to external cables. AXON® Micro-D PCB connectors are available in two layouts (0.100” pitch and 0.075” pitch) and in two configurations (vertical mount and right angle mount connectors) for flexible and rigid printed circuit boards.

NOTE: typically, the PCB connector tends to be female, however male versions are equally available.

NON-MAGNETIC PCB CONNECTORS 0.100” PITCH

CBR 0.100” Condensed Right Angle mount
Available from 9 to 100 ways
Available in metal shell
PCB code: CBR

See pages 78 to 85*.

CBP 0.100” Condensed Right Angle mount low profile
Available from 9 to 51 ways
Available in metal and plastic shell
PCB code: CBP

See pages 86 to 91*.

NON-MAGNETIC PCB CONNECTORS 0.075” PITCH

BS 0.075” Vertical mount
Available from 9 to 100 ways
Available in metal and plastic shell
PCB code: 75SB

See pages 116 to 125*.

CBR 0.075” Condensed Right Angle mount
Available from 9 to 100 ways
Available in metal shell
PCB code: 75RB

See pages 178 to 184*.

*: Non-magnetic PCB connectors have the same dimensions and PCB layouts as standard PCB connectors. Construction of the references on the next page.
NON-MAGNETIC PCB CONNECTOR

- For strong magnetic field environments.
- Minimal magnetic disturbance.
- Condensed board right angle connector for flexible and rigid printed circuit boards.
- Operating temperature: 125 or 200°C.
- Several tail lengths available.
- 9 to 100 contacts (up to 51 for plastic connectors).

See pages 190 to 200 for hardware description.

CONDUCTOR TYPE
S: Silver plated solid conductor AWG 25.

TAIL LENGTH
1: 2.80 mm (0.110”).
2: 3.80 mm (0.150”).
3: 4.80 mm (0.190”).
4: 5.35 mm (0.210”).
5: 3.25 mm (0.127”).
6: 3.56 mm (0.140”).
7: 4.37 mm (0.172”).

Tolerance: ± 0.38 mm (0.015”).
Other lengths available on request.

*: not for plastic shell connectors.
**: only for standard profile metal shells.
***: only for plastic and low profile metal shells.
120 WAY MICRO-D CONNECTORS

- 120 way Micro-D connectors ........................................ 178
- 120 way connectors for cable and harnesses .................. 181
- Surface mount PCB card edge connectors .................... 182
- BS connector .......................................................... 183
- Connector saver ....................................................... 183
- PCB layouts .......................................................... 184
An enduring trend in the electronics industry is the continuing drive towards miniaturisation. This leads in turn to ever greater cabling densities with an ever larger number of signals required within limited space constraints. In answer to these challenges, AXON’ CABLE has developed a range of 120 way Micro-D connectors. They are available as pigtails or within assemblies but can equally be supplied as PCB connectors in either surface mount or through hole format. Connector savers are part of the range.

These connectors can be used for any applications where severe environmental conditions and high density cabling are critical. Keying hardware is an option.

AXON’ can offer specific numbers of contacts for custom designed applications. Specific designs are not contained within the MIL specification but AXON’s solutions remain fully compatible with the MIL-DTL-83513 standard as far as performance and construction are concerned.

Contact arrangements

1.27 mm (.050”) contact spacing.
1.27 mm (.050”) spacing between two rows.

120 way male and female connectors for cable and harnesses

Both male and female connectors can be assembled with various wire sizes in shielded and unshielded forms. High speed variants can also be produced, using controlled impedance shielded twisted pairs which allow data rates of up to 880 Mbps. For space applications, these connectors are assembled in a class 100,000 clean room, and can be terminated with ESA ESCC (European Space Agency) approved wires.
Surface Mount PCB Card Edge Connectors

Surface Mount (SMT) connectors have two rows of 28 AWG gold plated leads at 0.635 mm (.025") pitch spacing to terminate to PCB’s by soldering. Lugs on either side of the connector allow for mechanical clamping onto the PCB.

AVAILABLE VERSIONS

- Female style to mate with a male pigtail or assembly connector.
- Male and female styles to mate together (this option has a longer shell to retain the keying hardware system).
- Female style for panel mount.

FEMALE SMT

to mate to a male cable connector.

P562622

SEE CONTACT LAYOUT ON PCB PAGE 308
### BS Connector
The BS version is similar to the straight PCB connector style of the MIL standard. Available in male version only.

### Connector saver
Connector savers have been developed to protect expensive equipment. Typical applications include test equipment and space-grade instruments.

**BANDING TOOLS**

MANUAL HAND TOOL | CLAMPING VALUES | PNEUMATIC CLAMPING TOOL | RECOMMENDED BANDING VALUES* | CALIBRATION DEVICE
-----------------|----------------|-------------------------|-----------------------------|------------------|
AXOCLAMP® AX CL 01 | A 40199 | 100-180 LBS | A 35199 | 180 | A 50099 |
AXOCLAMP® AX CL 03 | A 30199 | 60-100 LBS | A 35599 | 90 | A 50099 |

*: Banding values are given for information only.
Removable jackscrews according to MIL-DTL-83513/05

For pigtail & solder cup connectors only.
- 2 sizes of hardware: one version for shell sizes from 9 to 69 ways and another version for the 100-way shell size.
- 1 kit consists of 2 screws and 2 e-rings.
- Hex socket head or slot head.
- Material: passivated 300 series stainless steel.

Note
1st line: kit part number (to be used for ordering).
2nd line: military specification number.
3rd line: hardware code for pigtail connector.
Dimensions are given in millimetres (inches).

- 100 way jackscrew: 0.51 N.m / 4.5 inch-pounds.
MICRO-D & NANO-D ASSEMBLY KIT

Installation, maintenance and general handling of miniature connectors integrated within your system requires specific tooling and operating procedures. AXON® offers 2 toolboxes with all the proper tools and instructions on how to safely handle Micro-D & Nano-D connectors. These toolboxes greatly simplify connector handling, thus aiding correct installation. This will guarantee the connector’s performance in terms of signal and power transmission, and of product life.

Characteristics

- Assembly kits consisting of universal tools for the assembly of rectangular Micro-D & Nano-D connectors and the majority of custom-designed connectors.
- Easy-to-mount components in any situation.
- Both toolboxes delivered with mounting / dismounting procedures: short instructions and a demonstration video (CD).
- Dedicated tooling with torque values as defined in the MIL-DTL-83513 & MIL-DTL-32139 standards: optimisation of fastener / hardware performance and enhanced connection reliability.
- Each assembly kit is equipped with a screwdriver with dedicated torque range. Our whole line of miniature connectors is covered by both screwdrivers. See table hereafter.
